Road Map :-

2021 Q3

- HOL Lunching
- Testing & Developing
- Personal Wallet for HOL Token
- Air Drop
- Community Growth
- CMC Listing
- Exchange Listing
- Tocken Burning
- Web Design

2021 Q4

- Multiple Exchange Listing
- E-Commerce use Starts on
  www.shoppingbaba.in
- Tocken Burning
- Marketing

2022 Q1

- Exchange Listing
- 10% off our fees donating to
  Green enjoinment & Child NGO.
- Top 100 Traders Health insurance give away.

2022 Q2

- Testing & Devloping
- Community Growth
- Multipal E-Commerce Listing
- Exchange Listing
- Marketing
- 5% off our fees donating to
  Green enjoinment & Child NGO.
- Top 100 Traders Health insurance give away.

Why TRC-20 Standard Contract ?

TRC20 is a native token standard of the Tron blockchain. TRC20 tokens are one of the prominent tokens in the marketplace. Also, these tokens are becoming the primary focus for crypto token enthusiasts. Generally, the TRC20 is a technical standard that is based on the implementation of smart contracts.

TRC20 standard tokens help traders and investors to perform secure token transactions in a risk-free manner. Do you know one interesting fact about TRC20 tokens?. TRC20 standard tokens are the favorite crypto tokens for traders and investors in the crypto space.

However, the TRC20 token standard is far similar to the ERC20 token standard. TRC20 standard is useful for the creation of TRC20 tokens with the help of the Tron Virtual Machine. The TRC20 standard token can implement extra logic that is absent in the TRC10 standard tokens.

Apart from this, TRC20 standard tokens have a high energy level & bandwidth capacity compared to TRC10 standard tokens. That's why many startups and entrepreneurs are willing to create TRC20 tokens and approaching the finest TRC20 token development company to create a secure TRC20 token.

HOL :-

🔳 Standard Contract :

The Standard Contract of white HOL is deployed on TRON TRC-20 Standard Contract and is verified by tronscan. The Standard Contract address as is follow :
